

CAREER DEVELOPMENT

Introduction

I have attended two career talks organized by Mr. Habib on October 23, 2023, and another career talk by PPG on October 28, 2023.

Mr. Habib Talk

The speaker explained about the job application, job interview, and job survival skills. Moreover, the speaker mentioned the mistakes made by students during job hunting. One of the biggest mistakes graduates make is not participating in a lot of activities, such as social events. These types of activities teach us many soft skills, such as communication, teamwork, and more. He also shared some tips to get a job, such as being proficient in communication, problem-solving, and leadership skills.

PPG Talk

PPG is proficient in cutting-edge cloud technologies. PPG is always open to trying and implementing new technologies. Moreover, PPG creates a positive working culture. There are many friendly colleagues willing to help with our growth. Additionally, PPG fosters a balanced work environment. They organize various programs, such as Women Empowerment Day to create a healthier and more positive environment for employees.

View

I am grateful to have attended both talks because they provided me with valuable knowledge about the working life. Mr. Habib provided me with a lot of information related to job hunting and job survival skills. Additionally, PPG shared me about their company experiences and taught how to become a professional data engineer in the future. They also shared some essential skills to grow as a data engineer. I strongly believe that I will acquire all the necessary skills that PPG mentioned and become a successful data engineer in the future.
