

## PC Assemble (Lab) (22/11/2023)

### REFLECTION:

The PC assembly lab provided me with new skills and knowledge, teaching me the correct way to assemble and disassemble a PC with the guidance of a skilled lab assistant.

Previously, I often needed instructions due to a lack of knowledge. Fortunately, my group successfully demonstrated our newly acquired PC assembly skills. To assess our understanding, we took a brief exam, and I'm proud to have scored 5.5 out of 6 points.
